EDUCATION

Konkan Gyanpeeth College of Engineering, Karjat

Bachelor of Engineering (Information Technology) | Graduating: 2027

TECHNICAL SKILLS

Languages: Python, JavaScript, C, HTML, CSS

Frameworks: Flask, React

Databases: PostgreSQL, MongoDB

Tools: Git, GitHub, VS Code, Postman

Core: OOP, DBMS, Operating Systems, Computer Networks

PROJECTS

- **ATS Resume Analyzer** – Built an AI-powered ATS Resume Analyzer that evaluates resumes against job descriptions, generates ATS scores, provides role-specific and general feedback, and supports PDF resume uploads.
- **CDN Network Simulator** – Developed a Flask-based CDN simulator with origin server, regional edge nodes, intelligent routing, caching (TTL), failover, health monitoring, and an interactive dashboard demonstrating distributed system concepts.
- **Driver Drowsiness Detection** – Built a Python application that detects driver drowsiness and triggers alerts using computer vision concepts.

CERTIFICATIONS

- **JPMorgan Chase & Co. – Software Engineering Job Simulation (Forage)**
Completed practical tasks involving project setup, Kafka integration, H2 database integration, REST API integration, and REST API controllers in a simulated industry environment.
- **TCS iON Career Edge – AI Foundation**
Learned fundamentals of AI, Generative AI essentials, prompt engineering basics, AI tools, and responsible AI through hands-on learning.
